VERMIFUGE.

WHY IS IT THAT SO MANY CHILDREN die under the age of five years? That a large proportion of children die under that age, has long been a subject of remark, and without a satisfactory cause ascertained, it is certain. Also it is known that worms exist in the human system from its earliest infancy; therefore parents, especially mothers, who are more constantly with their children, cannot be too observing of the first symptoms of worms; for so surely as they exist, can they be

SAFELY AND CERTAINLY removed from the most DELICATE INFANTS, by the B. A. FAHNESTOCK'S Vermitage. It is perfectly harmles, contains no Mercery.
